CAPITAL PROJECT CHANGE ORDERS

Board of Education acknowledges the importance of granting the Superintendent some discretion in managing the district's capital projects. For the purposes of maintaining a project's workflow, the Board permits the Superintendent to authorize change orders worth up to $25,000 per month. The Board will be advised of these change orders at the next Board meeting. Change orders exceeding that amount or change orders that would, in aggregate, exceed the threshold, must be approved by the Board of Education in order to be authorized.

The Superintendent is not authorized to approve any change order other than those recommended by the project architect, or beyond the budget allocated for the project.
