EVALUATION OF SUPERINTENDENT

The Board of Education recognizes that student growth, district progress, and community satisfaction are all affected by the performance of the Superintendent of Schools. The Superintendent cannot function effectively without periodic feedback about his/her performance. Therefore the Board recognizes its responsibilities to evaluate the Superintendent.

The evaluation of the superintendent shall occur at least annually, pursuant to the regulations of the Commissioner of Education, and will be discussed only during an executive session. The final written evaluation report will include signature lines for each trustee. Annual performance criteria will be established by the Board of Education in order to provide the highest quality leadership for the school system.
