

GRADING SYSTEMS

Grading is considered a positive tool to indicate achievement and development in each class or subject in which a student is enrolled. The Board of Education recognizes that the classroom teacher has the primary responsibility to evaluate students and determine student grades. Classroom teachers will evaluate students and assign grades according to the established system. When a student's achievement is evaluated, attention should be given to his/her unique characteristics and to accepted standards of performance in the educational setting.

Grading will be based, in part, upon student improvement, achievement, and participation in classroom discussions and activities. Parents will be informed regularly, at least three (3) times a year, of their child's progress. The reporting key and/or rubrics will be appropriately explained.

Grading will not be used for disciplinary purposes, i.e., reducing grade for an unexcused absence, although a lower grade can be given for failure to complete assigned work or for lack of class participation.

All students are expected to complete the assigned class work and homework as directed. If work is missed due to absence, the student is expected to make up the work. The student and/or the student's parent(s) or guardian(s) should discuss with the student's teacher an appropriate means of making up the missed work.

The professional judgment of the teacher should be respected. Once a grade is assigned to a student by a teacher, the grade may only be changed by a district administrator after notification to the teacher of the reason for such change. Should an administrator enforce a grade change, he/she shall be prepared to report to the Superintendent of Schools and/or the Board.
