June 26, 2019

Dear Willow Road Families:

The Valley Stream Union Free School District Thirteen, along with its environmental services partner, Unitech Services Group, will conduct an asbestos abatement project inside Willow Road Elementary School. The District anticipates all interior work to be done on Thursday, June 27<sup>th</sup>, a time when no children or staff members will be present in the building. The current school year ends on Wednesday, June 26<sup>th</sup> and summer programs are not scheduled to begin until Monday, July 1, 2019.

As with all asbestos abatement work, the District's environmental services partner will be following strict federal and state guidelines mandated for all asbestos removal and monitoring of air quality throughout the entire process. Any additional asbestos abatement work to be performed subsequent to June 27<sup>th</sup> is anticipated to be on the exterior of the building away from any interior space utilized for summer programming. As always, the District's highest priority is the health and safety of our students, staff members and all those who visit our school.

Sincerely,

Constance D. Evelyn, Ed.D.  
Superintendent
