Constance D. Evelyn, Ed.D., Superintendent of Schools

December 3, 2020

Dear Valley Stream UFSD Thirteen Parents and Guardians,

This morning, a family at the James A. Dever Elementary School self-reported that a parent of two children in two of our classrooms tested positive for coronavirus (COVID-19). Following the guidance issued by the New York State Education Department, and the Nassau County Department of Health (NCDOH), we immediately contacted the county health department for confirmation and direction. We also confirmed whether there are any siblings attending the Central High School District or other regional schools.

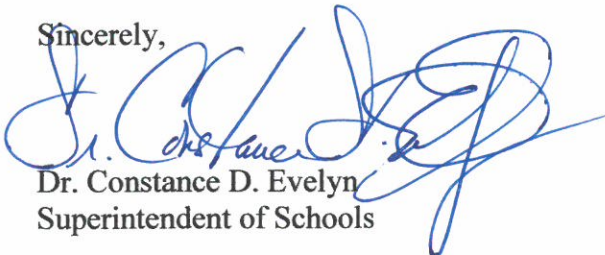

At this time, the only individuals required to quarantine are those who came into direct contact with the students without following established safety protocols. In this classroom, we have adhered to the maintenance of six feet and mask wearing. Moreover, as an additional safety measure, desk barriers were installed throughout the district and these continue to be utilized daily.

The students' last day of attendance was Wednesday, November 25, 2020, and are reportedly not presenting any symptoms associated with COVID-19. The students are not in school today and will not be allowed to return to school for at least 7-10 days as per the new CDC guidelines. The NCDOH is conducting an investigation and contacting anyone identified as a close contact to the students.

As a reminder, our facilities are cleaned and disinfected on a daily basis as per the New York State Department of Education and CDC guidelines. Based on guidance from the NCDOH, it is not necessary that we close the building or enact any further restrictions or measures at this time.

We will continue to monitor this case and keep you updated with any pertinent information. Please continue to exercise the safe practices recommended by the Centers for Disease Control (CDC) including socially distancing, wearing a mask, and frequent hand washing.

Sincerely,

Dr. Constance D. Evelyn
Superintendent of Schools
